IBM webMethods Adapter 10.1 for SAP

IS Versions	SAP releases supported	Notes
10.1 10.3 10.5 10.7 10.11 10.15 11.1	SAP Adapter supports SAP R/3 3.1I and all later SAP ERP releases including the S/4HANA On-Premise edition. SAP Adapter supports SAP S/4 HANA Private Edition 1709 and all later versions running in AWS and MS Azure. SAP Adapter supports MS Azure while connecting to SAP S/4 HANA Private Edition running in AWS and MS Azure, and while connecting to SAP ECC systems running in an intranet.	<ul style="list-style-type: none"> WmSAP 10.1 is not supported for the standard Alpine MSR image, as the adapter will not load. WmSAP 10.1 is only supported for the UBI MSR image. Maintenance and support for the JCo 3.0 libraries ended on Oct 31st, 2020. It is therefore recommended to use SAP_10.1_Fix12 (or later) together with JCo 3.1.8 (or later) and IDoc Library 3.1.3 (or later). For more details see SAP OSS Note 1077727. Please note that SAP does not support previous library versions. List of supported JCo 3.1 platforms might change in the future. For information about the current list of supported platforms, see SAP OSS Note 2786882. It is not recommended to use JCo versions before 3.1.8 versions due to RFC listener issues. Please see the JCo release notes for more details. SAP_10.1_Fix Readme lists the detailed requirements for each WmSAP 10.1 fix. In case of RFC connection errors when connecting to S/4HANA running in a Cloud environment, the following entry must be added to the IS custom_wrapper.conf file: wrapper.java.additional.210=-Djco.cpic_keep_alive_period=30 S/4HANA Cloud Edition is not supported.

[Top](#)

Additional Notes

Adapters support only those versions of JVMs, JDKs, and Operating Systems that are certified with the adapter and supported by both, the host Integration Server and the backend applications.

All the adapters should install the latest fix, to avoid any issues which are already fixed.

Datadirect driver:

Adapter for JDBC supports only those Datadirect drivers which are shipped with the Integration Server.

The Datadirect driver documented as supported with the database servers is restricted to the exact driver shipped with the Integration Server. For example, DataDirect driver documented as supported with SQL Server 2014 on IS 9.5 SP1 is the driver shipped only with IS 9.5 SP1.

You must retain the Datadirect drivers in their original installation path. Do not copy or move the Datadirect drivers to the adapter's jars directory.

The following OS platforms on VMWare virtual machines are supported if the adapter is supported on these platforms.

- Microsoft Windows 2008 Server Standard and Enterprise
- Microsoft Windows 2008 R2 Server Standard and Enterprise
- Microsoft Windows 2012 Server Datacenter and Standard
- Microsoft Windows 2012 R2 Server Datacenter and Standard
- Microsoft Windows 2016 Server Datacenter and Standard (x86-64)
- Microsoft Windows Vista
- Microsoft Windows 7
- Microsoft Windows Server 8 Pro and Enterprise Edition (x86-64)
- Microsoft Windows 10 Pro and Enterprise Edition (x86-64)
- Red Hat Enterprise Linux 5 / 6 / 7
- SUSE Linux 11 / 12
- Oracle Solaris 10 / 11

For details about operating system support for a particular version of Integration Server, see the System Requirements document for that particular version on the [Software AG Documentation Web site](#).

For details about the version of webMethods Developer that corresponds to an Integration Server version, see webMethods Developer Support.

For details about the version of Software AG Designer that corresponds to an Integration Server version, see Software AG Designer Support.

For details about the JVMs and operating system back end supports, see their respective website.
